

A Guide to using
Family Tree Analyser
and
Lost Cousins

What is Lost Cousins?

Lost Cousins is a website designed to connect people with other family historians who are related to the same family. It does this by matching the census records mainly the UK 1881 census and the US 1880 census. It is 100% accurate as if you and someone else are a blood relative of the same person on the census then you are cousins. So, unlike other sites, there is no guessing as to similar sounding names or places, just a 100% accurate way of finding others who are researching the same family.

This can be important as people who are researching the same family are not only your cousins, they have likely approached that search from a different branch so they may well have found information or broken through a brick wall that you are still stuck on. They may also be part of the branch that inherited family photos or documents. So, connecting with these “Lost Cousins” can really help your research.

Lost Cousins is free to search and free to join. Join also allows you to get the award-winning newsletter that comes out 2-3 times a month. You can also choose to subscribe to the website with a £10/year subscription that supports the site and gives you access to the details of your matches.

How does FTAnalyzer work with Lost Cousins?

FTAnalyzer provides various reports on census records you have already found that shows your ancestors on the census you could upload to Lost Cousins. Starting with Windows v7.3 and Mac v1.2 there is a feature where you can automatically upload your Census records to the Lost Cousins website with minimal effort.

Outline of Simple Steps to upload your data to Lost Cousins

1. First if you aren't already a Lost Cousins member visit the website www.lostcousins.com and register

The screenshot shows the Lost Cousins website registration page. The header is blue with the logo 'LOSTCOUSINS' and the tagline 'PUTTING RELATIVES IN TOUCH'. A navigation menu on the left includes links like Home, Log-in, Password reminder, Change password, Change email address, JOIN NOW, Latest newsletter, and Newsflash. Below this is a 'Free to search and free to join!' banner with a 'FREE' starburst and a 'MORE' button. The main content area is titled 'Registration' and includes a 'LOG-IN' button for existing members. It contains instructions for new users, a 'Have you ever been a member before?' section, and a 'If you are not sure whether you have registered before' section. The 'Account Details' section follows, with fields for Primary email address, Confirm email, Title, Forename, Surname, Address 1, Address 2, Town / City, County / State / Province, ZIP / Postcode, and Country (set to United Kingdom). There are also fields for Secondary email address, My beneficiary, and a dropdown for 'How did you hear about lost cousins?'. Explanatory text for each field is provided on the right side of the form.

Registration

Already a member? If so please **LOG-IN**

Only those items marked * are compulsory, but for the best results fill in as many as you can.

Have you ever been a member before? Please do NOT register again if you have previously been a member of LostCousins, even if you have changed your email address. If you know your password you can still log-in using your old email address; if you don't know your password, please use the form on the Contact Us page to tell us about your change of address.

If you are not sure whether you have registered before you can check by requesting a password reminder - we'll tell you whether an account already exists under that email address.

Account Details

Primary email address * Your email address will be your log-in name; we will send you a temporary password.

Confirm email *

Title (Mr.Mrs.Ms. etc)

Forename *

Surname *

When you agree to make contact with a cousin the name you enter here will appear on their My Cousins page.

Address 1

Address 2

Town / City

County / State / Province

ZIP / Postcode

Country *

Your postal address will not be revealed to anyone, but we may use it to contact you if we cannot reach you any other way.

Secondary email address

Please provide an alternative email address if you can - we will use it only if we are unable to contact you at your primary address. We will use it with discretion, so it could belong to a close friend or relative.

My beneficiary

If there's someone you'd like to take over your research when the time comes, please tell them and enter their email address here.

How did you hear about lost cousins? *

2. Load your GEDCOM into FTAnalyzer – [see Part 1 of guide series for information](#)

3. Select the Lost Cousins Tab – this shows you information about the census records you have and allows you to view reports that shows you the possible people you could upload to Lost Cousins

Census Records with valid Reference to upload to Lost Cousins

England & Wales Census 1881: 10 possible 49 without valid census ref
England & Wales Census 1841: 1 possible 38 without valid census ref
England & Wales Census 1911: 0 possible 12 without valid census ref

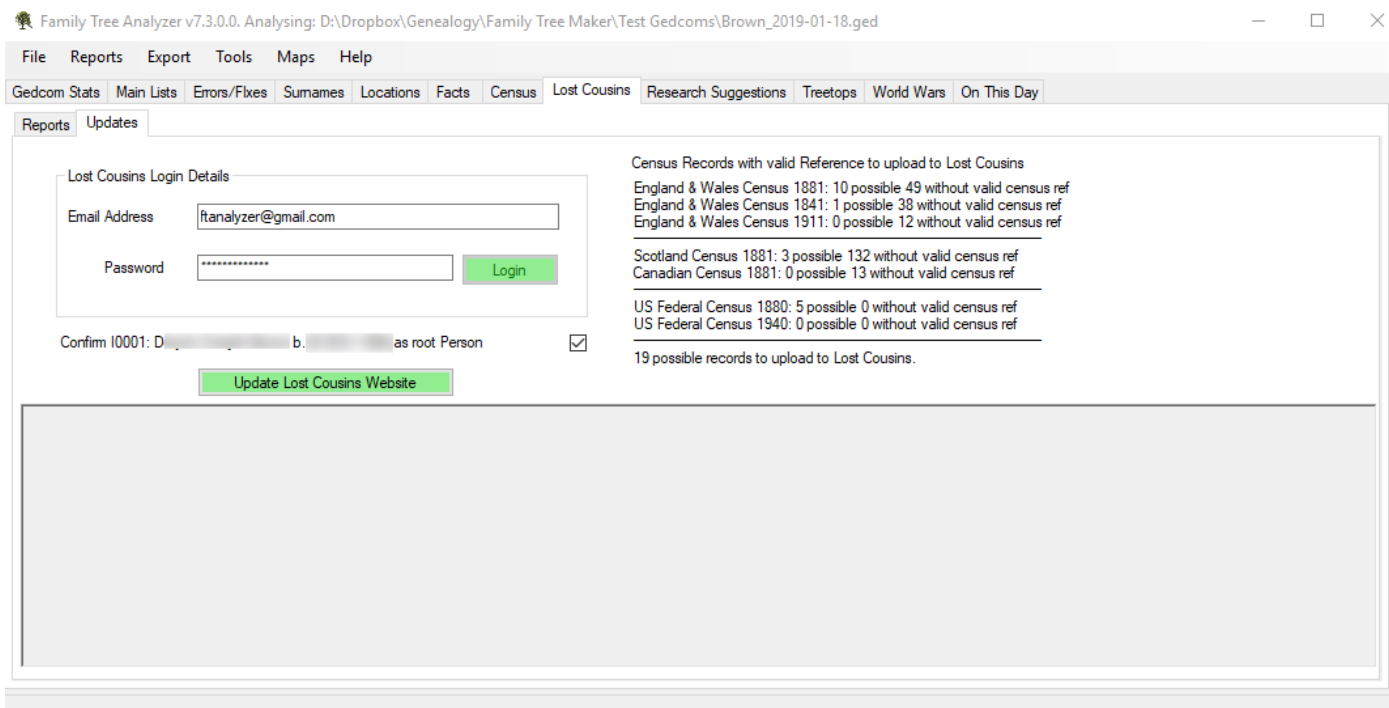

Scotland Census 1881: 3 possible 132 without valid census ref
Canadian Census 1881: 0 possible 13 without valid census ref

US Federal Census 1880: 5 possible 0 without valid census ref
US Federal Census 1940: 0 possible 0 without valid census ref

19 possible records to upload to Lost Cousins.

5. Confirm the root person – Lost Cousins looks to confirm whether people are blood relatives or related by marriage, so the root person needs to be correct to ensure the relationship type is set correctly.

- Click the green “Update Lost Cousins Website” button.

- Once the update process has completed the website will open in your browser allowing you to view your results on the Lost Cousins website and click search to check for new matches.
- Contact any new matches to see/learn more about your family

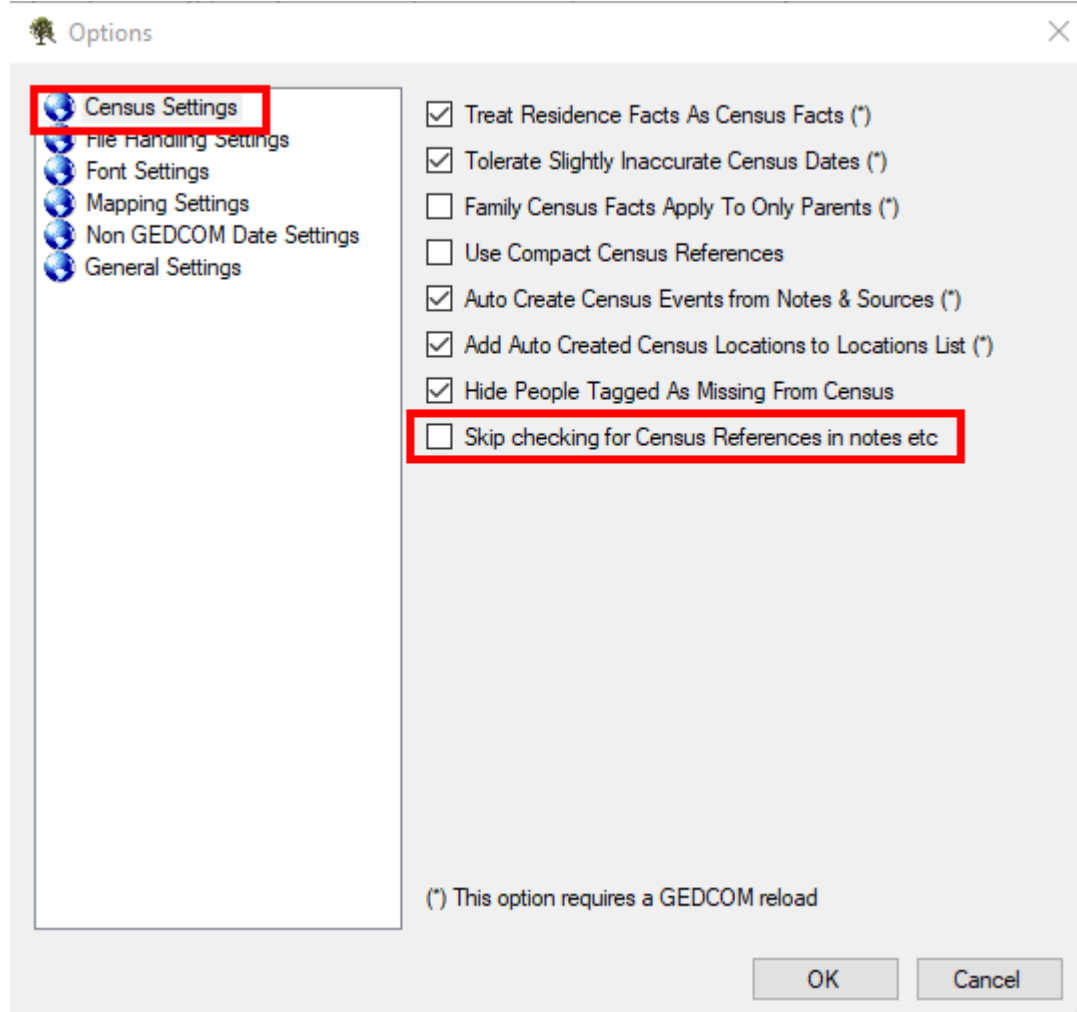

Background Steps

Before you can successfully upload data into Lost Cousins there's a few things you need to have done.

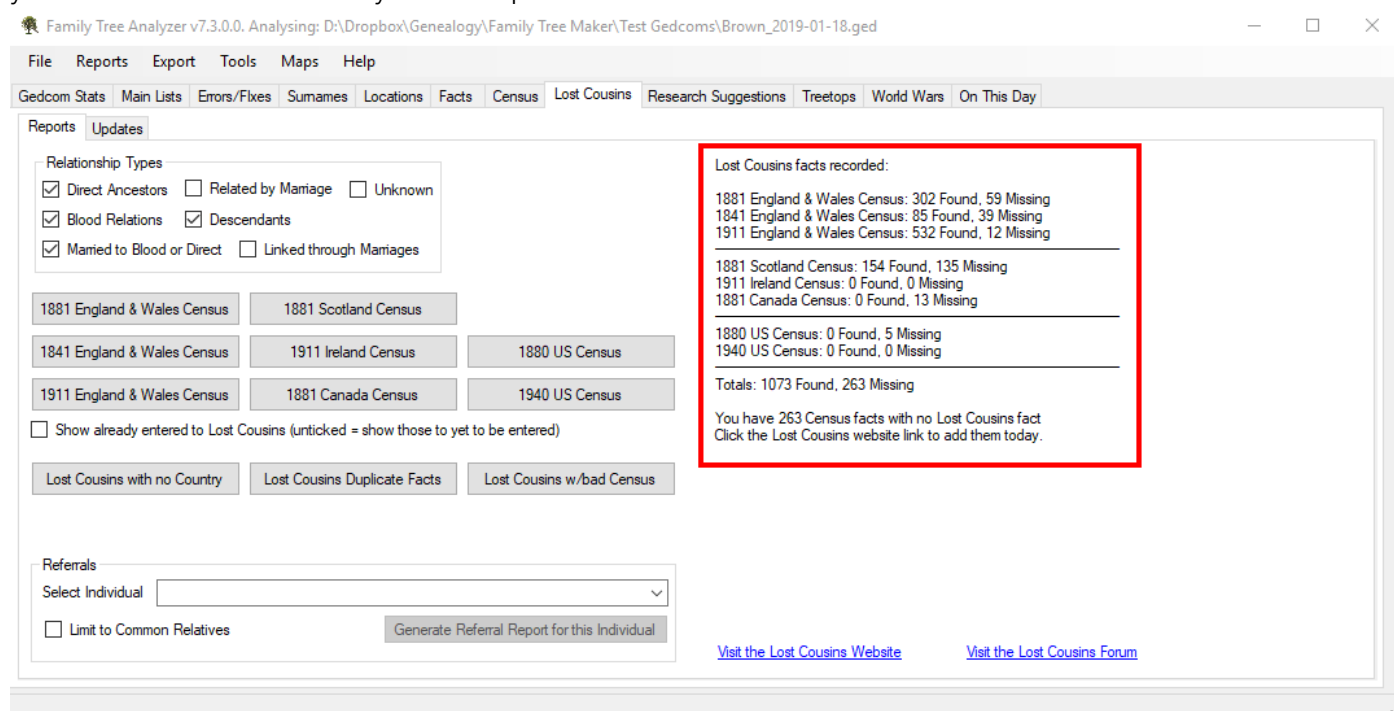

- You must have found your relatives on the census. This may seem blindingly obvious but if you haven't found your relative on the census you aren't going to be able to make a match.
- You need to have a census reference from the census entered in your tree against the census record or stored in the notes or the source record.
 - Note that many websites such as Ancestry and Find My Past and many family history programs will automatically record the census reference in your tree when you merge the data.
 - FTAnalyzer will try to automatically detect these census references and will report in the GEDCOM loading screen and in the Lost Cousins screens how many it found
 - The references found need to be considered valid to be uploaded to Lost Cousins.
 - If you have already entered records at Lost Cousins, then FTAnalyzer will attempt to match the entries against your records on the Lost Cousins website.
- If you don't yet have any census records or census references then you can use the reports highlighted on the Lost Cousins Tab (see image above) to find the records on Ancestry/FindMyPast/FamilySearch and FreeCen by simply double clicking on a census record in those reports it will open a search results form on the chosen website.
 - You then find the census record/reference and update your tree with that information, so it is permanently recorded on your file.
 - The next GEDCOM you export from your tree will then contain these references and can be uploaded automatically.
- If you have census references that aren't being recognised please use the unrecognised census references report and raise an issue at www.ftanalyzer.com/issues so I can try to add recognition for the format to a future version.

Suggested Method of Working

Before you start make sure you have turned on the option to check for census references on loading. Updating records to Lost Cousins requires a census reference to be identified. There is an option to skip this step which speeds up load times but is required when working on this section.

The Lost Cousins Reports Tab gives you information on the right-hand side on the number of census records you have found and whether you have uploaded them to Lost Cousins website.

You can use the report buttons to view what's missing a Lost Cousins entry and check the Census reference field to see if a census reference has been identified or not.

83 Rows containing 59 Individuals and 45 Families. Double click to search Ancestry for this person's census record. Shift Double click to display their facts.

In this example there are missing census references – an example is shown in yellow, a valid census reference shown in green and unknown census references – an example is shown in red.

For Unknown Census references it may be that this is because the program hasn't recognised a valid reference format or it maybe there is something slightly wrong with the format entered that is preventing it being recognised. If you think the format is right but not being picked up please raise an issue at www.ftanalyzer.com so this can be fixed in a future version.

Entering and Fixing Census References

In your tree program you can add a reference either in an ancestor's notes or as part of a source citation – if you use Ancestry or Find My Past and merge records it's typically a source citation that is used to record the reference automatically.

A UK census reference typically takes the form

Class: RG11; Piece: 2953; Folio: 63; Page: 8; GSU roll: 1341707

Simply by adding this to the census record description, to the source citation for that census or even just to the note for an individual will flag that reference against that individual within FTAnalyzer. So really all you need to do is to find the census record online and cut and paste the reference text into the person's record.

Finding a Census Reference

The easiest way to find a census reference is to use the Research Suggestions tab of FTAnalyzer. Select your preferred website from the drop down and double click one of the coloured buttons to auto search for that record. Then when you've found it follow the instructions above to enter the reference into your ancestors details.
